### **Special points of interest:**

- Centaurus Database Structure
- Intermediate Reporting

# University of LVM 2017

## **N-Centaurus Advanced Client Training November 6th—8th**

New this year, the University of LVM is offering our two most popular N-Centaurus training sessions during the week of the LVM Users' Conference. This hands-on training explains the Centaurus database structure and prepares you for writing your own custom reports. LVM welcomes up to 10 students per session. Please, no more than two per organization. Early registration is recommended since sessions will fill up quickly.

### **Monday, November 6th**

#### **Centaurus Database Structure**

**1:00 pm—4:00 pm**

In this session, you will break down the Centaurus database structure, identifying the data relationships within the software. If you are attending Intermediate, we strongly recommend you also attend this session. LVM recommends those attending this session have knowledge of MS-SQL table structure.

### **Tuesday & Wednesday November 7th and 8th**

#### **Intermediate Reporting**

**9:00 am—4:00 pm**

This 2-day session is for those Super Users who are familiar with the Centaurus Reporting Tool and want to learn how to make simple modifications to their reports. In this session, you will learn how to modify forms, edit simple SQL statements, send reports to Excel or other formats, and create custom reports from existing reports.
